Claims 1-12 are pending in this application which claims the benefit of international application PCT/US02/08160, filed February 25, 2002, and US Provisional Application 60/271,533, filed February 26, 2001.

Applicants' claims are drawn to methods of inhibiting an ethylene response in plants by applying a bicyclic (claim 1, formulas I and II) or spiro (claim 2, formula III) cyclopropene compound to the plants.

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the cited prior art teaches or suggests methods of inhibiting ethylene responses in plants by application of a bicycle cyclopropene compound of applicants' formulas I or II (claim 1), or by application of a spirocyclopropene compound of applicants' formula III (claim 2).

Sisler et al (US 5,518,988), Daly et al (US 6,017,849) and Sisler et al (*Physiologia Plantarum* 100(3):577-582), teach that cyclopropene compounds in which the cyclopropene ring is substituted with various substituents are known agents for inhibiting ethylene responses in plants. All of the disclosed substitutions are simple ring substitutions. Bicyclo and spiro ring systems with the cyclopropene ring as one of the rings are neither taught nor suggested.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Mark Clardy whose telephone number is 571-272-0611. The examiner can normally be reached on 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreenivasan Padmanabhan can be reached on 571-272-0629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
